## [A Thomas Jefferson Education: Teaching a Generation of Leaders for the Twenty-first Century](#)

Is American education preparing the future leaders our nation needs or merely struggling to teach basic literacy and job skills?

Without leadership education, are we settling for an inadequate system that delivers educational, industrial, governmental, and societal mediocrity?

In *A Thomas Jefferson Education: Teaching a Generation of Leaders for the Twenty-first Century*, Oliver DeMille presents an overview of a new educational vision based on proven methods that really work! Teachers, students, parents, educators,

legislators, leaders, and everyone who cares about America's future must read this compelling book.

This title is available in paperback, Collector's Edition hardback, audio book, PDF download and Kindle.

**Note:** This volume is a philosophical overview, and not a step-by-step guide for implementation of the Leadership Education model. For additional help on application, see [Leadership Education: The Phases of Learning](#) and [A Thomas Jefferson Education Home Companion](#).
